Experience

AT&T Government Solutions, Inc. 10+ years

Developed myriad internal applications and software tools. Worked with stakeholders to understand and gather requirements. Designed and built enterprise solutions that met and exceeded essential business goals. Managed databases and code repositories. Contributed to AT&T SmartBase product development. *Reporting directly to Director of IT for GSI.*

General Research Corporation International 5 years

Managed corporate Internet and intranet websites. Oversaw major website redesigns and participated in committee meetings. Built tools and workflows to automate processing of data from legacy systems for online presentation. *Reporting directly to VP of Corporate Communications.*

Tapmodo Interactive LLC Background

My personal freelance and open source development brand. Published multiple open source projects. Developed a popular jQuery plugin for image cropping that was included in Wordpress core. Recently re-wrote that project in pure ESNext Javascript, including wrappers for jQuery and Vuejs. Completed work for happy clients large and small. *This is how I stay current.*

Excellent references available.
